Art Unit: 2826

## **DETAILED ACTION**

### Drawings

1. Figures 2 and 3 should be designated by a legend such as --Prior Art (per commonly assigned and now abandoned serial number 07/774,121 filed on 10/08/1991)-- because only that which is old is illustrated. See MPEP § 608.02(g).

# **Double Patenting**

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,184,568. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of instant application are simply a broader version of the claims of the patent. It would have been obvious to one of ordinary skill in the art to claim the invention in its broadest term possible version because it would maximize the patent protection.

Art Unit: 2826

#### Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- a. Tanabe et al. US Patent No. 4,780,846 teaches placing conductive lines of a memory device in a boarder are for optimizing chip are.
- b. Matsumoto Japanese reference 0073367 teaches the structure of an integrated chip capacitor.
- c. Clayton US Patent No. 4,656,605 discloses a single in-line memory module (SIMM).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ahmed N Sefer whose telephone number is (703) 605-1227.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J Flynn can be reached on (703) 308-6601.
